Mini-Project – Week1

Choose one of the tasks below.

1   Grafana Platform

Explore Grafana platform and create Dashboard app for a development task of your choice (e.g. Frontend-web, database, or Backend-web monitoring). The Implementation source code should be submitted and a short report to describe your findings.

https://grafana.com/

2   Visual Data Analysis in Python

Follow the provided online assignment on Kaggle website, implement a solution for the given task and provide a short report describing your findings.
